

Located The Landmark Forest Adventure Park is located in the Scottish Highlands, offering a variety of indoor and outdoor attractions. Amusement Technical has carried out a wide variety of works at Landmark Forest since 2010, including:

The Lost Labyrinth': theming elements

This funhouse-like attraction incorporates a selection of surprises and challenges. Amusement Technical worked with Landmark Forest to design some theming elements, helping to create a unified and exciting design. We also designed and manufactured a Magic Waterfall and a Magic Tap illusion to inspire and excite visitors to the labyrinth.

Water slide: traffic light system

The water slide at Landmark Forest did not have an effective rider management system in place. Amusement Technical designed, manufactured and installed an easy-to-understand traffic light system, to help riders use the slides safely.

Rotating tunnel: remote operator control

The rotating tunnel at Landmark Forest was an operator headache, [because – need a little more detail here]. Amusement Technical designed, manufactured and installed a remote operator control, so that the tunnel can be safely managed and operated by a staff member from a distance.

All of these projects have helped the Landmark Forest Adventure Park continue offering a dynamic and entertaining amusement park experience, while driving efficiencies for staff and making their working lives easier.

At a glance

Client:	Landmark Forest Adventure Park
Project:	Design and manufacture of 'Lost Labyrinth' elements, traffic light system for water slide and remote operator control for rotating tunnel
Result:	A variety of dynamic and appealing attractions, safer and more efficient management systems
